

INTRODUCTION

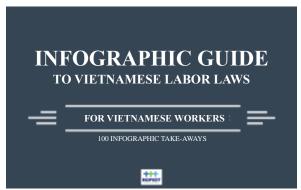

INFOGRAPHIC GUIDE TO VIETNAMESE LABOR LAWS

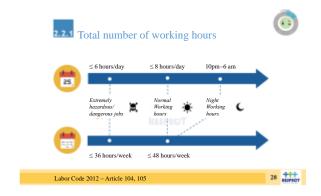

RESPECT VIETNAM

INFO@RESPECTVN.COM | WWW.RESPECTVN.COM

Preface

Labor conflicts and disputes occurred primarily due to lack of labor law knowledge. Workers often face difficulties in understanding lengthy and complicated legal documents while employers find it challenging to interpret and cite the labor codes, laws and policies on various workplace issues, etc. in the process of cooperation with their workers in the same 3workplaces.

Acknowledging this situation, Respect Vietnam, in collaboration with national and international legal experts, develops this Guide with the aim of helping workers, employers implement the labor laws and supporting law enforcement in workplaces.

We would like to express our gratitude for the support of various government agencies, international and local organizations, as well as for valuable practical suggestions by a number of managers, trade unions and workers on the content and layout of this Guide.

We hope to continue receiving supports from various concerned stakeholders to achieve our goal of 100,000 copies reaching out workers across Vietnam by 2018.

05 CHARACTERISTICS OF THIS GUIDE BOOK

1. The Guide is designed based on Employment Relation Cycle

CÁCH SỬ DỤNG CẨM NANG

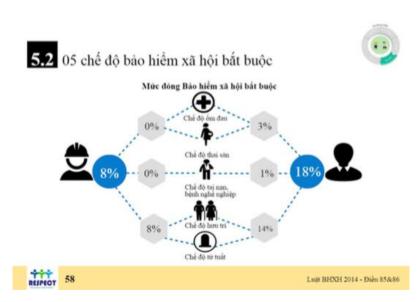

70% surveyed workers expressed that they encountered many difficulties in reading and understanding labor provisions because of their complicated contents and a lack of visual aids (RespectVN 2016). This guide book is thus designed based on employment relation cycle which specifies any worker's Examination, Negotiation, Performance, Amendment, Performance (postamendment) and Termination of employment relations with employers.

In addition, to simplify this employment relationship, the

Guide focuses on law regulations that affect the two most important documents to workers, namely (i) Labor Contract which defines individuall workers' legitimate relation with their employers, and (ii) Collective Bargaining Agreement which defines the individual role in a labor collective. 300 workers who were consulted on this Guide said that this method was easy to understand (figure above).

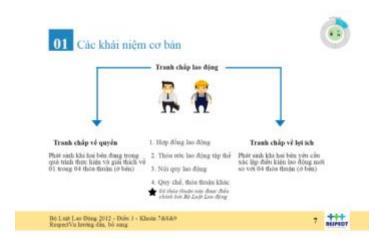

2. The Guide use infographics to simplify labor laws' contents

Upon using internationally recognized icons and symbols, this Guide helps workers effectively improve their "reading comprehension" of laws and thus apply the Guide's infographic messages to their daily work.

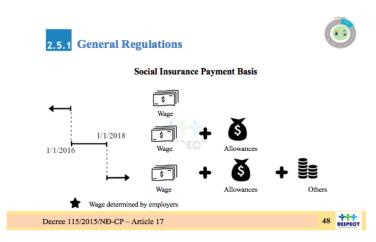

In RespectVN's Integrated Conflict Management Program - WE@WORK, the participating workers have used infographics to identify their rights and responsibilities, as well as applied them as a basis of complaints or suggestions to their employers' decision-making process. These infographics have also allowed workers to identify issues more quickly and accurately.

3. The Guide applies logical thinking to concisely synthesize and describe legal provisions

With valuable support from legal experts, the Guide's editorial board has adjusted the original legal language towards simple, concise and friendly phrases. Logical thinking is regularly applied to help workers distinguish different concepts, behaviors and legal measures stipulated by the laws. For instance, regarding labor disputes (figure), the concept of conflict of interests and conflict of rights have been re-written to help workers differentiate them, however legal important terms are preserved (rights, interests, establishment of new conditions, etc.)

4. The Guide strengthens workplace cooperation by providing multi-language versions

This Guide is not only welcomed and used by workers, but also interested by office staff, mid-level and senior managers and even international staff. In recognition of this demand, Respect Vietnam has developed an English version of this Guide and will soon prepare Chinese and Korean language editions.

International brands and foreign investors will be beneficiaries of multi-language editions. Once employers and workers have the same knowledge of labor laws, the possibility of cooperation for productivity enhancement, conflicts and disputes reduction and mutual respect will be increased.

5. The Guide is an educational and skill-shapening tool in the age of technology

Low-income workers in Vietnam have increasingly used technological devices such as phones and computers. The Guide hopes to be a trend-setter in providing an online training tool for workers who cannot afford higher education or skill training.

Using this Guide in WE@WORK Integrated Conflict

Management Program, the participants have confirmed the

Guide's benefits as time-saver and knowledge improvement.
